Subject:

Mr. Bonner,

In the past you have been helpful, so I reach out to you again for some advice. I'm the Site Manager on a remediation project in Theodore, AL. We're at the old Kerr McGee chemical plant off Rangeline Rd, which has closed. As a vendor, our firm is trying to remove a non-toxic chemical compound in the ground (iron oxide). This element was left behind in several landfills and currently sits just above the ground water table. We have encountered several issues with the State of Alabama (ADEM & ADPH), which is overseen by the U.S. EPA. Our firm is not paid for the work, but had entered into an agreement with the Trust who oversees the property. We had hoped to remove the iron ore located in the north end of the 800 acres; and later sell the ore at market in order our costs and perhaps make a small profit.

Our concern is over regulation by numerous government agencies (state & federal). I hope to secure a meeting with you or a staff member to explain our situation.

This property will be sold one day & holds real promise as Airbus expands in Mobile. This 800 acre site could be a future air supplier or manufacturing site. This certainly means more jobs in Alabama.

I await your reply. Thank you.

Dale Crews
